The UmtPlus® package includes three comprehensive programs, making this the ultimate tool for performing work measurement studies.

UMT MANAGER: Create, Edit and Manage any number of configurations from a PC

- ▶ Possibility of virtually unlimited elements per configuration with up to 16 levels
- ▶ Over 51 programmable categories
- ▶ Use colors for helpful visuals
- ▶ Transfer and access configurations easily
- ▶ Set statistical parameters and confidence intervals
- ▶ Classify each element as Value Added, Non Value Added, or Necessary

UmtPlus®: Collect data simply by clicking once on the applicable element on your PDA.

- ▶ Times are recorded to 1/100th of a second
- ▶ View and edit all observations at any time while on the floor
- ▶ Use multiple PDAs to collect data
- ▶ Enter up to eight descriptive headers for each study
- ▶ Add speed ratings to your observations
- ▶ Add numeric codes automatically or manually as you go
- ▶ Add comments to your observations manually or automatically
- ▶ View the designated amount of observations needed to respect statistical parameters

STAT UMT: Perform data analysis, Reports and Graphs.

- ▶ Instantly view reports and graphs: List of actions; Summary; Normalized Summary; Graph by Type and or Category; Pareto Charts; Compilation Charts, Takt Time Chart, Time Distribution chart
- ▶ Can be used to transfer data to MS Excel, MS Access, or other spreadsheet/ data base
- ▶ Combine compatible studies
- ▶ Edit a study at any time
- ▶ Manipulate data by excluding data from your analysis - reports are automatically recalculated
